Parent 1: The reason that I chose Australian Christian College was I was looking for a place that was more interested in them.

Parent 2: I really needed my son to have some good one-on-one attention, and I knew that this would happen at this school. I knew he wouldn't get lost in the system.

Parent 3: The class sizes for us was a good indicator of a good school. The quality and the education of the teachers. The venue, like I've said, a good indicator of a good school. You put all that together and you compare that to others, and this outshines them all.

Parent 2: The teachers, they seem to be interested in my child as a whole person, not just another student in the school.

Parent 1: My kids grow better when they're loved and looked after. What's interesting is that even though the focus wasn't on their academics, because they focus was on them they actually began to excel at academics, and they're doing better than they ever did before. I'm thrilled with that.

Parent 3: Their homeroom teachers are... they're always spoken about at home, and they're always putting into their life, both in education but also in life, general social skills as well. Which is an asset to us.

Parent 2: I have felt that their academic abilities have been increasing, they've been learning more. Their spiritual walk, I can see so many benefits there as well.

Parent 3: For us to have a school where I know the children are not just going to get a theological lesson, they're going to get it in-woven with the classroom, so in all classes whether that's science or history, I know that they're going to get a God's perspective of that.

Parent 1: It's a place where they are literally being grown into what they're going to be in their future. I think there's going to be values that are placed in them while at this school that will last them for the rest of their life.

Parent 2: One of the things that I love about this school is that they seem to be interested in my son's spiritual walk. They encourage them without enforcing pressure, it's just they encourage their own personal relationship with Jesus.

Parent 3: I would definitely say that this school for us as a family is the best school that we can find that fits our needs.

Parent 2: I would certainly say to any parent wanting to bring their child here to speak to the principal, Mrs. Kwok, to have a look around the school, see the attitudes of the children, see the way they interact with each other and their teachers.

Parent 1: The principal, the teachers and all the staff all are just amazing in their care of the kids, and also in their communication with us as well. That's really appreciated and we love this school because of it.
